

The major points of extension of the submitted paper include:

- An expansion of the introduction
- The addition of Section 2.2.3 related to the creation of the Finite Element mesh of a masonry multi-leaf wall
- The addition of Section 4.2 related to the assessment of the out-of-plane collapse behavior of a masonry multi-leaf wall, with an investigation on the role played by the transversal interconnection between the outer layers in the structural response
- An expansion of the conclusions
- An expansion of the bibliography
