

- Extension of the literature review included in Section I
- Introduction of a new temperature-based test plan composed by three different test profiles:
 - Test T.1. – Positive Temperature Step-Test (already explained in the 24th IMEKO TC4 International Symposium conference paper)
 - Test T.2. - Back and Forth Temperature Step-Test (extension)
 - Test T.3. - Temperature Cyclic Test (extension)
- Discussion of the experimental results achieved during the ADC testing (Test T.2.)
- Discussion of the experimental results achieved during the batteries testing (Test T.3.)
